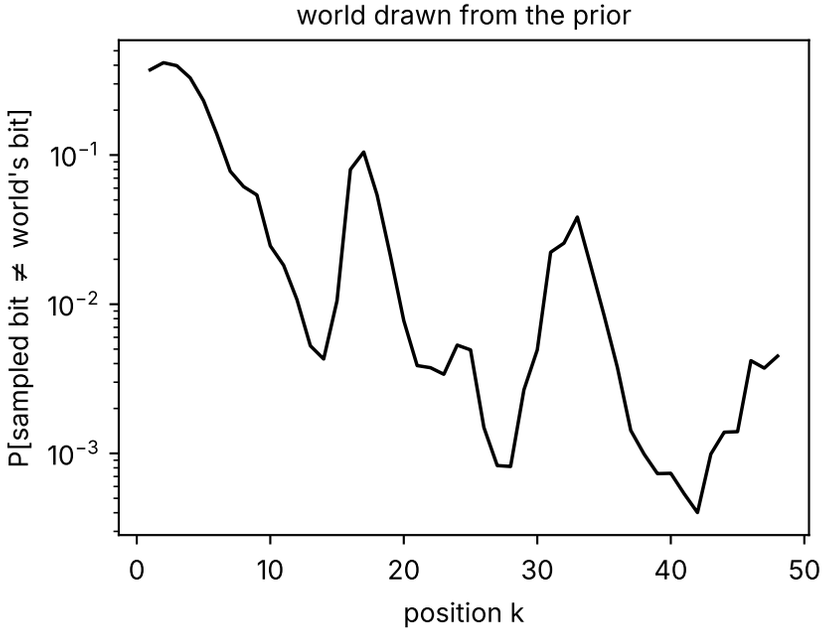
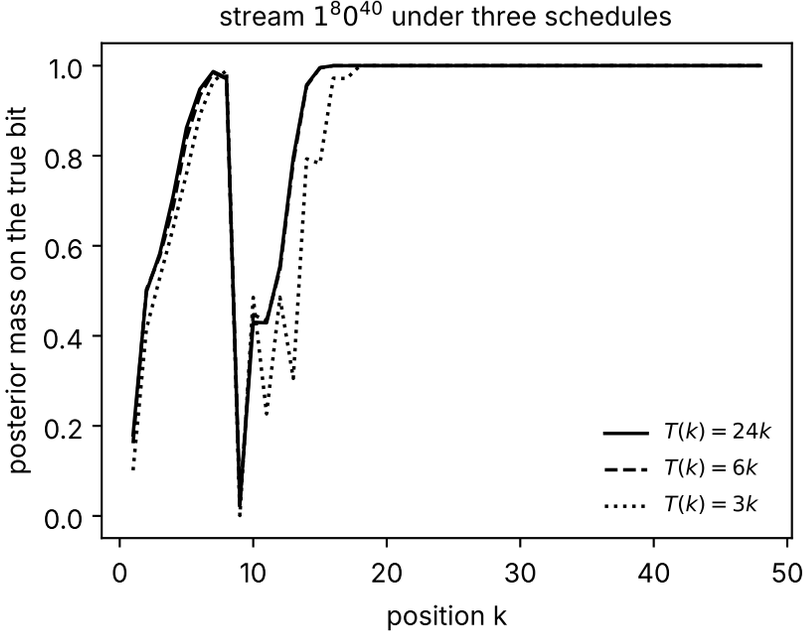
three streams, schedule $T(k) = 24k$
posterior mass not on the true bit
position k
ones
alternating
zeros



world drawn from the prior
P[sampled bit ≠ world's bit]
position k



stream $1^8 0^{40}$ under three schedules
posterior mass on the true bit
position k
$T(k) = 24k$
$T(k) = 6k$
$T(k) = 3k$
